# Elegant IFTTT Crestron Modules

## Release Notes

### GENERAL INFORMATION

Version Number	Release Notes
<b>v1.0</b>	Initial Release of Modules
<b>v1.0.1</b>	Fixed a bug with quickly sending multiple commands to IFTTT that could cause the commands to fail. This is a patch release, as you only need to replace the ElegantIFTTT.clz file, none of the modules themselves. This is a non-breaking change and won't affect how the modules or the service operates.
